MAILBOX INSTALLATION GUIDELINES

Custer County Colorado

1. Customers must use only approved traditional or contemporary mailboxes. Custom-built mailboxes may be used if the local Postmaster gives prior approval and the mailbox conforms generally to the same requirements as approved manufactured mailboxes.
2. Mailbox supports should be a semi-arch or extended arm type which allows snow plows to sweep near or under mailboxes without damaging supports and provides easy access to the mailboxes by carriers and customers.
3. Mailbox supports should be no larger than a 4"x4" wood post or a 2" diameter standard steel or aluminum pipe buried no more than 24". This type of post should safely break away without causing damage or injury if struck.
4. Mailboxes should be installed with the bottom of the mailbox at a vertical height of 48" above the road surface.
5. Mailboxes should be installed with the face of the mailbox even with the shoulder of the road on Custer County roads.
6. Mailboxes must be placed a minimum of 8 feet from the edge of the highway on State highways, with the approach to the mailbox properly filled and graded.
7. Mailboxes must be on the right side of the road in the carriers direction of travel. The approach to the mailbox should be clear of snow, vehicles and other obstructions.
8. House number and street name must be on the mailbox, visible to the approaching carrier. Letters and numbers must be a minimum of 1' tall.
